

ACE Hardware Vendors:

The purpose of this communication is to remind vendors about the Traverse Systems Chargebacks related to Non-Preferred LTL Carriers introduced December 2020. As we are currently assessing test data, here are some of the errors we are seeing that will result in future chargebacks. Please review and address these errors, especially if you have received notification of Non-Preferred Carrier violations for your vendor(s).

1. Using a non-preferred LTL carrier
 - Please refer to the ACE Hardware Routing Guide on www.acehardware-vendors.com for a list of preferred carriers for each RSC
 - PLEASE NOTE: YRC Roadway is NOT a preferred carrier
2. Entering an incorrect SCAC in the ASN (Advanced Ship Notice) (LTL or Parcel)
 - The correct SCAC must be entered, no spacing, misspelling, etc. For example, the SCAC for XPO is CNWY. If you enter CNWE, XPO, etc., this will result in a charge.
 - ** A list of valid SCAC codes is included with this letter and will be maintained in the Learning Center on the Traverse web portal as well.
3. Using CUPU as the SCAC for ACE Fleet pick-up.
 - The correct SCAC for Ace Fleet pick-ups is **ACHW**, not CUPU or any customer pickup designation. Failure to use this SCAC will result in a charge.

Please ensure this information is distributed to all appropriate parties, especially your shipping department(s). Our goal is for you to have these errors corrected before the chargebacks begin **February 21, 2021**.

This information will also be posted in the Learning Center on the Traverse web portal.

Thank You,

ACE Hardware Traffic Department
